

peel back these little things like this and if they match then you can collect. And, I mean, I really don't know how to answer that because it's up to the Legislature, I guess, and it could be done. And then they will say, well, why don't we have that then? Why can't we have video slots? Why is...why is...why are we so limited? I think that this amendment, Senator Hall's amendment would give those people access to what they really want.
